The Profile School Board conducted a school culture and climate survey during the late spring and early summer of 2018. The School Board contracted an expert in the field, William Bryan, PHD, from the Center for Secondary School Redesign, intending to have Mr. Bryan conduct a survey of Profile School. The study surveyed Profile faculty, staff, and students. After reviewing the results of the survey, the School Board has decided to form a committee representing all vested stakeholders. The groups represented in the committee include members of the community, faculty, staff, school board, administration, and students. The committee will be asked to review the results of the survey and make recommendations (to the School Board) to improve Profile's climate and culture.

The committee held its first meeting in October setting two goals aimed at improving school climate and culture. One goal looked at improving communication with the other goal looking to increase collaboration. The committee will meet for a full day work session on December 06, 2018, facilitated by William Bryan, PHD.

The Profile School community will provide diverse educational opportunities to inspire, engage, and challenge all students.
