

## August 2018 Profile School Principal's Report

Summer has been a busy time around Profile. The LED lighting project has not gone as smoothly as we had hoped. The project has had a few delays but it is nearing completion. A special thank you goes out to Paul Lehmann for supervising the project throughout the summer on top of his other duties; I think everyone will be happy with the finished product.

The facilities department has done a phenomenal job cleaning and preparing the building in anticipation of staff and students arrival at the end of the month. Mary, Bob, and Nancy have been working around electricians and summer school to get their respective areas ready to go.

Summer school went well. Due to the student's hard work and our dedicated staff, we had two students complete their programming in less time than they were originally scheduled! Staff and students both enjoyed their time together and made the most of the extended school year setting and individualized educational opportunities. I would like to thank everyone involved that made it such a success.

Our Administrative and Guidance teams worked throughout the summer to ensure that 2018-2019 will be an extremely successful year. Some initiatives included preparation for our new scheduling model, implementation of our restructured advisory and x-block, and assisting newly enrolled students, recent graduates, and perspective students.

Preseason Soccer kicks off August 13<sup>th</sup> and August 20<sup>th</sup> for high school and middle school athletes respectively. We are looking forward to great seasons from all our sports teams this year.
